Here's how we are keeping you safe at our events…

DISINFECTANT SPRAYING

All of our equipment is disinfected with CDC/FDA approved cleaner before, during and after each event. We utilize a disinfectant spray fogger and apply it to all equipment to provide a deeper level of cleansing on all our equipment.

SOCIAL DISTANCING

We will strive to ensure social distancing measures are followed to maintain a safe distance of 6ft between all of our guests.

EQUIPMENT OPERATORS

All staff and equipment operators will wear masks and gloves when handling equipment and assisting guests. This will reduce exposure and help prevent the spread of COVID-19.

HAND SANITIZER

Hand sanitizing stations and hand sanitizer will be placed at each station and throughout the event for guest to use at their leisure.
